# No more 'Hello Garci,' please, Abalos tells ARMM poll officials

By Benji Alonzo

It's time to stop the 'Hello Garci' culture in the ARMM, says the new chief executive officer of the ARMM, Gen. Romeo Abalos. He says the ARMM officials should stop the 'Hello Garci' culture and focus on the people.

## Palace move likened to a Queen's gambit

By Ronan Rosales

The Philippine Free Press (PFP) editorial board's call for Gloria Macapagal Arroyo to run for prime minister in the 2010 elections is a move that has been likened to a Queen's gambit.

The move is seen as a bold and risky strategy, as it involves the president stepping down from her current position to run for a different office.

The move is also seen as a way to ensure that Gloria remains in the country's political leadership, as she is the only woman in the country's political leadership.

It could be a solution, some say.

The idea is to use the traffic lights to generate electricity, which can be used to power the lights themselves. This would be a great idea, as it would save a lot of money on electricity bills. ## Cell phone users cry out for help

**E**SPIONAGE has always been a murky, shadowy world of intrigue, often more art than science. But now, as we head into another cold-war era, the stakes are higher than ever. The stakes are the future of the world.

**How to measure the letters**

Letters 1 to 26 are given separate numbers and the groups are then identified by number. Letters are given the following numbers: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, I=9, J=10, K=11, L=12, M=13, N=14, O=15, P=16, Q=17, R=18, S=19, T=20, U=21, V=22, W=23, X=24, Y=25, Z=26. The numbers are then grouped together to form the code. For example, the word "WATER" would be grouped as 23 1 20 5 18. The numbers are then written in a single line to form the code. For example, the word "WATER" would be written as 23120518.

the 1990s, the number of people in the United States who are obese has increased by 50 percent. In 1990, 15 percent of the population was obese, but by 2000, that number had risen to 23 percent. And the trend is continuing. In 2008, the Centers for Disease Control and Prevention reported that 33 percent of Americans were obese, up from 23 percent in 2000. The increase in obesity is a major public health concern because it is linked to a host of chronic diseases, including heart disease, diabetes, and certain types of cancer. The CDC also reports that obesity is the leading cause of death in the United States, accounting for 280,000 deaths each year.

The second hypothesis is that the more the individual is involved in the decision-making process, the more likely he or she is to accept the decision. This hypothesis is based on the idea that involvement in the decision-making process leads to a greater understanding of the decision and its consequences, which in turn leads to a greater acceptance of the decision.
